What is a Capital Improvement Plan?

The Capital Improvement Plan (CIP) identifies capital projects, the necessary public financing required, grant and other funding opportunities, as well as the on-going impact to the operating budgets. The identification of capital projects to be funded is based on multiple factors including feasibility, community enrichment, asset age, historical preservation, safety, and preventative maintenance. City staff annually review and update the Capital Improvement Plan; however, only the current year budget is adopted upon approval of City Council. The future year forecasts shown in the CIP help plan for capital repairs, replacements, and acquisitions, which allows for careful and strategic financial planning. This long-term strategic financial planning ensures that the City sustains a strong financial position. The identification of a project within the CIP does not guarantee construction. The initiation of any project requires other evaluations and approvals that must be completed for a project to advance to design and ultimately construction. Moreover, City Council has the ongoing ability to review and revise projects based upon community priorities and financial resources.

Capital improvement projects, whether funded or not, utilize a 10-year time horizon, and are developed using a prioritized implementation plan. This task is one of the key strategies identified in the City's Strategic Plan under Goal 3: Sound Infrastructure – Strengthen City Infrastructure. Strategic Plan goal and objects are discussed further in the Strategic Plan section. A CIP is defined as a: *“Long-term investment of funds to improve, repair, replace, or construct an asset, facility, or public infrastructure.”* Additionally, the following criteria must be met in order for a project to be included in the CIP. Those conditions are stated below:

- **Budget Threshold:** \$50,000
- **Asset Lifespan:** 5+ Years
- **Construction Projects:** Included
- **Purchase of Major Equipment/Assets:** Included
 - If purchase and installation of parts extend the lifespan of a system.
- **Development of Studies/Plans:** Not Included
- **Routine Maintenance:** Included
 - If major maintenance or rehab projects extend the lifespan of an asset.

Prioritization scoring guidelines were developed for each project to be scored based on the primary functions a project serves. The guidelines are also intended to maintain consistency in application across all asset-managing departments by requiring asset-specific scoring methodology using unique operational needs and an objective scoring tool. The prioritization process provides that:

- Projects will compete only with projects within the same asset categories, which include: Utilities Assets; Streets, Storm Drains & Traffic Assets; Facilities, Parks & Open Space Assets; and Technology & Communications Assets.
- Prior to inclusion in the CIP Budget, a simple high-level project score will be developed to aide in determining whether the project will be included in the next fiscal year CIP Budget.
- Project Priority Scores will be updated as the condition of the project changes or other information becomes available.

The table below lists the scoring weights taken into consideration when projects are scored. Projects receive points for each category from a minimum of zero to a maximum equivalent to the weight of the category.

Prioritization Criteria	Streets, Storm Drains & Traffic Projects	Utilities Projects	Technology & Communications Projects	Parks, Facilities & Open Space Projects	Definition
Risk to health and safety	10	15	15	5	Protects the public or organization from severe illness or injury, irreversible health consequence, or undesirable situation
Regulatory/mandated requirement	15	15	15	5	Fulfills a State or Federal regulation or mandate
Condition and longevity of asset	10	10	5	10	Condition of asset or system is deteriorating with 25% or less of it's useful life, or is operating at capacity
Improves service delivery	5	10	10	15	Improve the delivery and access of services to the public
Funding availability/grant funded	15	10	5	10	Utilizes grants/funding source that must be expended within a certain period of time, or has a financial commitment to another party
Project readiness	5	5	5	5	Ready for construction
Contributes to financial well-being of City	5	5	10	5	Generates additional revenue for the City, reduces ongoing expenditures, or protects the organization from financial risk
Improves quality of life	10	10	5	15	Improves access to amenities that will enhance the quality of life for Corona residents; prevents service disruption
Fulfills a strategic plan goal	10	5	15	10	Directly contributes to the achievement of a citywide goal or objective established in the City's Strategic Plan
Sustainability and resource conservation	5	5	5	5	Preserves or reduces consumption of natural resources
Coordination of multiple improvements	5	5	5	5	Improvements benefit multiple assets, departments, or divisions
Master Plan implementation	5	5	5	10	Project is identified in a city master plan
Total Points	100	100	100	100	

Priority Scores for CIP projects, within each major asset category, have been grouped into the following Priority Categories.

- Projects that score 70 points and above are considered Tier I projects to be implemented in years 1-3 of the CIP.
- Projects scoring 35-69 are Tier II projects to be implemented in years 4-6 of the CIP.
- Projects scoring 0-34 are Tier II projects to be implemented in years 7-10 of the CIP.

Though the City now has a defined prioritization criteria metric for projects going forward, it is important to note that several factors will supersede this system of measurement and will make projects a top priority. Those factors include: Emergencies, Immediate Funding Deadlines, Time Sensitivity, and Significant Community Impact. In addition, projects that were added during Fiscal Year 2024 have not been scored and were automatically identified as Tier I projects.

Projects are classified into the following categories:

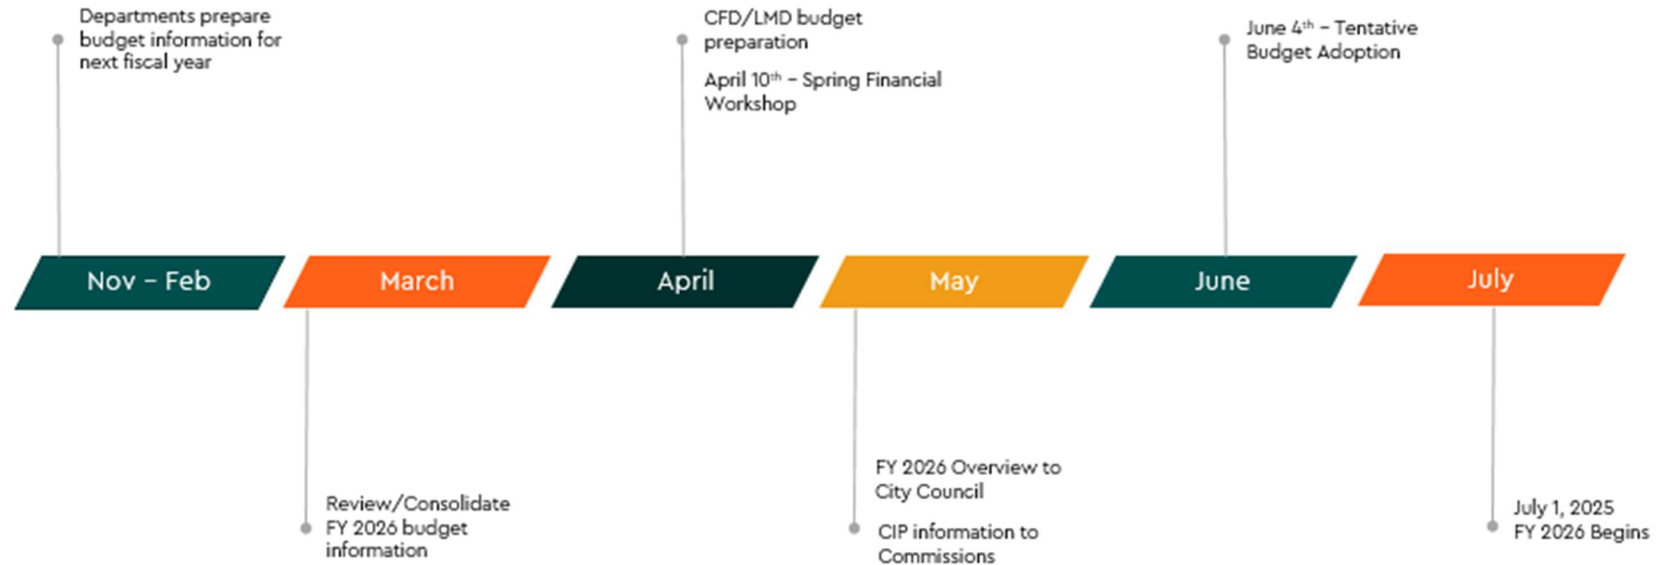

Capital Improvement Planning Process

Similar to the operating budget process, the capital improvement plan budget process begins in January of each year. The Finance Department works in cooperation with all City departments to formulate revenue projections for the upcoming fiscal year. From this, the individual departments use the projected revenues and existing fund balance information to prioritize and recommend the capital budget to meet next fiscal year's needs and plan for future year's objectives.

The City Manager's Office and the Finance Department jointly review each budget proposal, revenue assumptions, and all current financial obligations, before presenting the proposed capital budget to the City Council.

FY 2026 Budget Process

Financing the Capital Improvement Plan

The City utilizes multiple funding sources for its Capital Improvement Plan, including those that are legislatively set aside and committed to specific capital improvement projects, as well as other sources such as the General Fund and utility rates. The following information provides an overview of the resources available to fund and construct improvements:

General Fund

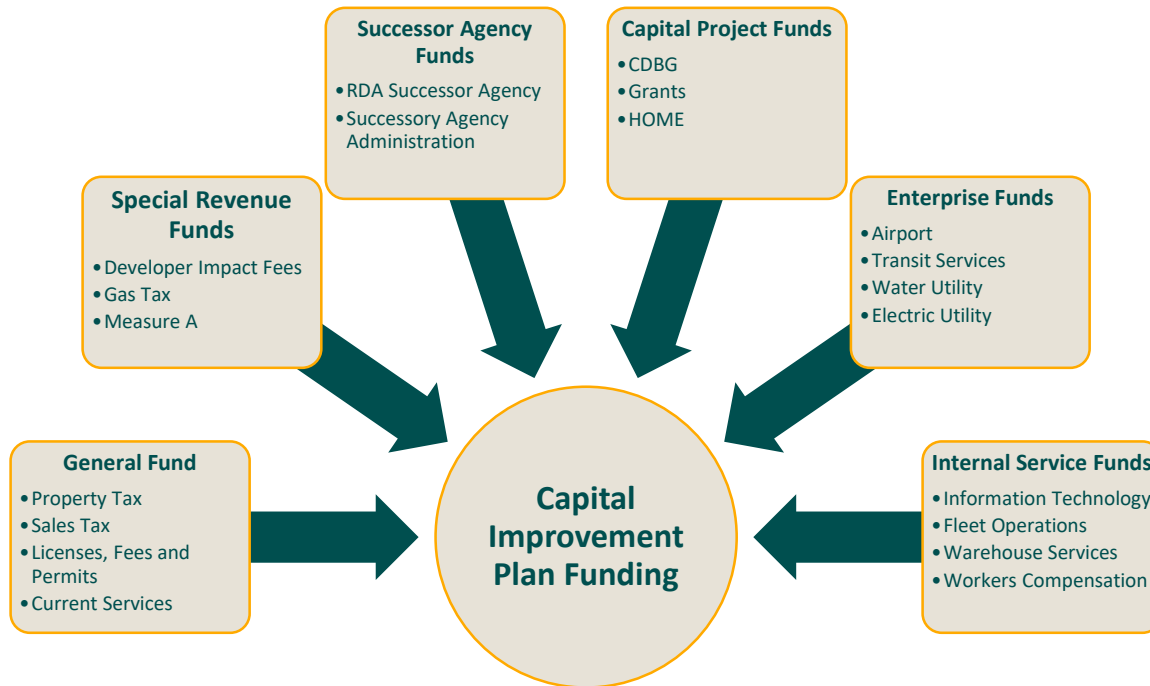

The General Fund is the primary operating fund of the City where all revenues that are not allocated by law or contractual agreement are accounted for. With the exception of subvention or grant revenues restricted for specific uses, General Fund resources can be utilized for any legitimate governmental purpose. A limited number of capital improvements are financed from this source since its focus is to fund ongoing operations. The General Fund accounts for most City programs and services, which are supported by general taxes and/or fees, including but not limited to: Property Tax, Sales Tax, Current Services and Investment Earnings.

Special Revenue Funds

Special Revenue Funds are used to account for and report the proceeds of specific revenue sources that are restricted or committed to specified purposes, often by legislative authority. For example, Gas Tax (Highway User Tax) and Transportation Urban Mitigation Fee (TUMF) revenues may only be used for certain street improvement and transit programs (and no other purpose).

Successor Agency Funds

The Successor Agency Fund was established to account for the assets and liabilities of the Successor Agency to the former Corona Redevelopment Agency. The Corona Redevelopment Agency dissolved with the passage of Assembly Bill 1X26 on January 31, 2012. The Successor Agency Trust Fund accounts for the allocated revenues received to pay enforceable obligations of the Successor Agency, until all of the outstanding obligations have been paid in full and assets are fully liquidated. For example, the RDA Successor Agency Fund accounts for the payments of enforceable obligations of the Successor Agency.

Capital Project Funds

Capital Project Funds are used to account for and report financial resources that are restricted, or assigned to capital expenditures, including acquisition or construction of capital facilities and other capital assets. For example, the Community Development Block Grant (CDBG) Fund consists of federal funding awarded to community-based agencies on an annual basis to address various community development needs.

Enterprise Funds

Enterprise Funds were established to finance and account for the operation and maintenance of facilities and services which are predominately self-supported by user charges. For example, the Water Utility Fund, support by Water Utility User Fees and Developer Fees, provides for the operations and capital improvements necessary to maintain and expand the water utilities, to meet the demands of commercial, industrial and residential growth.

Internal Service Funds

Internal Services Funds are used to separately account for departments that provide services to other City departments, and, therefore, incur costs that are then allocated to each receiving department. For example, the Information Technology and Fleet Operations Funds, both supported by shared services to other departments, provide funding for the information technology operations and fleet, including leased vehicle and replacement costs.

Amendments to the Capital Improvement Plan After Adoption

Because the Capital Improvement Plan is a planning tool, both short-term and long-term, there is a high likelihood that subsequent amendments will be made. Whether circumstances arise that were not anticipated, priorities change, events that were expected to occur do not take place, or any other factors, amendments to the CIP are sure to happen. In order for the CIP to remain an effective planning and management tool, it must reflect these changes, which must be reviewed periodically to make sure that they are consistent with City goals and policies. Upon adoption by the City Council, the City uses an amendment process to consider changes to the current year's CIP.

Amendments requiring Finance Director approval:

- At the request of a Department Director, and with the concurrence of the Finance Director, or his/her designee, transfer of funds/appropriations may occur:
 - Between capital projects having the same funding source and in the same project category, as long as these transfers are cumulatively equal to or less than ten percent (10%) of the transferring project in the current fiscal year's authorized budget.
 - When isolating or combining specific activity from a divisional section having the same funding source, within a departmental appropriation, to an existing or new project, as long as these transfers are cumulative equal to or less than ten percent (10%) of the transferring divisional section in the current fiscal year's authorized budget.
- Minor change to the title of a project.

Amendments requiring City Council approval:

- The actual cost of a project changes significantly from the budgeted cost, so that an additional appropriation of funds is needed in order to complete the project.
- With the approval of the City Council, transfer of funds/appropriations exceeding ten percent (10%) of the transferring project in the current fiscal year's authorized budget may occur between capital projects.
- The department decides to drastically alter the title or scope of an approved project or to add a new project.

If a department wants to modify future years' capital projects, updated capital project forms must be submitted during the following year's capital budget process.

Strategic Plan

A strong strategic plan is like a good roadmap – it identifies a destination and lays out a clear path to get there. The Fiscal Year 2021-2026 Strategic Plan was adopted by City Council on February 17, 2021. To view the City of Corona's FY 2021-2026 Strategic Plan, please visit the City's website at: <https://www.coronaca.gov/government/open-transparent/strategic-plan>. The policies and direction used to produce the Strategic Plan helped define the priority of capital projects proposed for new funding in Fiscal Year 2024. The following information outlines the goals and strategic objectives that the City will focus on over the next five years.

Goal #1: Financial Stability

Objectives

- Increase Financial Stability: Strengthen the City's long-term financial position to ensure ongoing provision of core services to all residents.
- Improve the Budget Process: Streamline the budget development process and increase residents' capacity and opportunities to participate.

Goal #2: Strong Economy

Objectives

- Support Local Businesses: Expand the local economy by supporting post-pandemic resilience and recovery of local businesses and attracting new enterprises to the City.
- Increase Job Opportunities: Reduce local unemployment and increase the number of living-wage jobs within the City.
- Revitalize Downtown: Invest in redevelopment of the downtown to create a thriving destination for residents and visitors.

Goal #3: Sound Infrastructure

Objectives

- Strengthen City Infrastructure: Ensure that City infrastructure—including streets, municipal facilities, water and wastewater systems, and technology—is well-maintained for current and future generations.
- Reduce Negative Impacts of Traffic: Reduce traffic congestion and optimize traffic flows.
- Enhance Parks and Recreation Facilities: Develop and enhance parks, trails, and recreational facilities to better serve residents.

Goal #4: Safe Community

Objectives

- Improve Public Safety Services and Emergency Response: Improve the response time and increase the capacity of the City's emergency response teams.
- Increase the City's Cleanliness and Appearance: Enhance the experience of residents, business owners, and visitors by ensuring the City is visibly clean.
- Strengthen Emergency Preparedness: Improve residents' capacity to prepare and respond to a major emergency or natural disaster.
- Reduce Homelessness: Develop a transformational system of services, shelter, and housing for Corona's homeless neighbors.
- Increase Access to Affordable Housing: Ensure an adequate supply of housing that is affordable and accessible for current and future generations.

Goal #5: Sense of Place

Objectives

- Increase Access to Arts, Culture, and Recreational Activities: Develop and expand opportunities and access to art, culture, and recreational activities.
- Celebrate the Community's Rich and Diverse Cultural Heritage: Enhance the relationship between the City, its neighborhoods, and residents to celebrate the community's rich and diverse cultural heritage.
- Increase Accessibility: Ensure all residents have equitable access to City services and spaces.

Goal #6: High-Performing Government

Objectives

- Enhance City Strategy: Leverage dynamic planning and a data-driven approach to ensure City activities are strategic.
- Strengthen Resident Involvement: Increase public trust in City government by focusing on accountability and transparent engagement with the community.
- Increase Employee Engagement: Ensure that employees are engaged, recognized, and given opportunities to grow.
- Improve City Services: Increase the efficiency and effectiveness of City's services.
- Create a High-Performing Organizational Culture: Increase innovation, teamwork, and creativity.

Fiscal Year 2026 Proposed Funding

The Capital Improvement Plan (CIP) is a comprehensive list of numerous projects across the organization. Specifically, the Fiscal Year 2026 budget recommends a total investment of \$33.6 million across four (4) categories. Facilities, Parks & Open Space; Streets, Traffic & Storm Drains; Technology & Communications; and Utilities. The largest dollar category is Utilities, which includes projects such as the Potable Waterline Replacement Projects (Project #1, #2 and #3), Water Reclamation Facility #2 Equalization Basin Replacement, WRCRWA Booster Pump Station, Digester Equipment Rehabilitation and Electrical Upgrade, and Electrical Cable Upgrades Project. The second-largest dollar category is Streets, Traffic & Storm Drains with projects such as the Citywide Street Pavement Rehabilitation (2025), Advanced Traffic Management System (ATMS) Phase III & Mater Plan Update, Citywide ADA and Sidewalk Improvements, Dynamic Message Sign Retrofit, and Ontario Ave Widening at Lincoln Avenue.

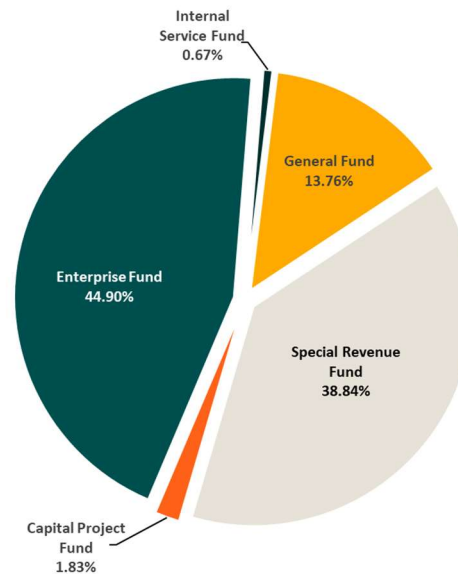

New CIP funding for Fiscal Year 2026 totals \$33,551,845 in the categories shown in the following table.

The estimated carryover funding as listed is an estimate of the continuing appropriations at the time of printing the proposed documents. When fund balance analyses are completed by the Finance Department after the close of the prior year-end, continuing appropriations will be finalized and authorized. Although not listed above, continuing appropriations may include amounts needed for grants that extend over more than one fiscal year.

PROJECT NUMBER FC-2022-11

PRIORITY LEVEL Tier I

LOCATION Corona Senior Center

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tracy Martin

FUNDING STATUS Carryover

CATEGORY Facilities, Parks & Open Space

DESCRIPTION/JUSTIFICATION

The Corona Senior Center is the only municipal facility in the City specifically dedicated to senior adults. The facility was assessed as part of a larger effort that provided information on the current state of the City's parks and community buildings. Several improvements were identified for the Corona Senior Center, including ADA improvements and equipment replacements. This project will bring the facility up to the current ADA standards as well as improve areas to provide better functionality for Corona's seniors.

CURRENT STATUS

Close-Out Phase – Project updated the fire alarm system, replace HVAC units, exterior façade, parking lot light upgrades, landscape upgrades, expanded the exterior patio, installing outdoor recreational lawn games, and ADA improvements standard.

CHASE PARK

PROJECT NUMBER FC-2029-02

PRIORITY LEVEL Tier II

LOCATION Chase Park

ADMINISTERING DEPARTMENT COMMUNITY SERVICES

PROJECT EXPERT Moses Cortez

FUNDING STATUS Future

CATEGORY Facilities, Parks & Open Space

DESCRIPTION/JUSTIFICATION

Chase Park currently has minimal features and amenities. While shade is provided at the play structure, there is no shade cover at the seating areas. Additionally, there are no direct connections to the adjacent Santiago High School or nearby homes. There is an opportunity to enhance the park by adding a sports court, shade structures over seating areas, and a shaded picnic area for groups. Active features such as a challenge area or activity center, along with additional lighting, could also be incorporated. The existing walkway currently dead-ends without a conclusion, and these new features could help make the park feel more complete and connected.

PROJECT NUMBER FC-2025-21

PRIORITY LEVEL Tier I

LOCATION Multiple Locations throughout the City

ADMINISTERING DEPARTMENT POLICE

PROJECT EXPERT Gary Griffiths

FUNDING STATUS Carryover

CATEGORY Facilities, Parks & Open Space

DESCRIPTION/JUSTIFICATION

The proposed upgrade to “DFR 2.0” represents a significant technological advancement that allows a single pilot to operate multiple pre-positioned drones without requiring visual observers at individual launch sites. This next-generation system features:

- Enhanced autonomous capabilities with automated flight paths
- Advanced airspace mitigation management through radar and Automatic Dependent Surveillance-Broadcast (ADS-B) technology
- Automated battery replacement systems
- Direct integration with the department’s Computer-Aided Dispatch (CAD) infrastructure
- Increased flight range for each drone

The DFR 2.0 platform enables expanded drone coverage to the entire city while substantially reducing personnel requirements and associated costs.

FIRE STATION #2 REBUILD

PROJECT NUMBER FC-2022-20

PRIORITY LEVEL Tier I

LOCATION 225 East Harrison Street

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Robert Peterson

FUNDING STATUS Carryover

CATEGORY Facilities, Parks & Open Space

DESCRIPTION/JUSTIFICATION

Fire Station No 2 was built in 1961 with an expansion in 1996. The station currently does not meet the needs of the Fire Department for personnel or equipment storage. Fire Station No. 2 serves as a battalion headquarters and houses a paramedic engine, paramedic aerial truck, the urban search and rescue unit and also the swift water rescue team. This project will construct 2,304 square feet of temporary housing for the station personnel during construction, a new 15,551 square foot fire station, and a 9,044 square foot apparatus storage building that will serve as the temporary apparatus bay during construction and will also ultimately house the equipment necessary to perform all the functions of Fire Station No. 2 and the duties of the battalion headquarters.

CURRENT STATUS

Project expected to go out to bid in Q1 2025. Project construction to begin in Fall 2025.

OPERATING BUDGET IMPACT

Only impact to the Operating Budget will be Fire personnel time allocated to the project.

CITY OF CORONA GREEN ALLEYS

PROJECT NUMBER ST-2023-03
PRIORITY LEVEL Tier I
LOCATION Citywide
ADMINISTERING DEPARTMENT PUBLIC WORKS
PROJECT EXPERT Gerardo Sanabria
FUNDING STATUS Carryover
CATEGORY Streets, Traffic & Storm Drains
DESCRIPTION/JUSTIFICATION

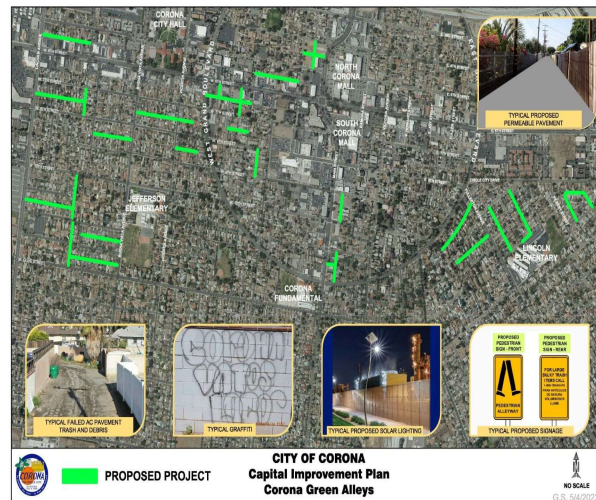

The Project will beautify alleyways by removing graffiti, trash, and debris, install solar lighting, replace existing distressed pavement with permeable and impermeable pavement, and install wayfinding signage that will identify alleys as pedestrian pathways, communicate how to report graffiti for removal, and request for large trash pick-up. Moreover, the Project will install permeable pavement that will allow rainwater and other surface water runoff to infiltrate into the local water table or aquifer.

CURRENT STATUS

Construction work began on September 16, 2024, the contractor has not met the original completion date of December 31, 2024, and now Contractor projects to finish the Project by 2025.

OPERATING BUDGET IMPACT

PROJECT NUMBER ST-2025-04

PRIORITY LEVEL Tier III

LOCATION North Cota Street to Oak Street Channel

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Fredy Castillo

FUNDING STATUS Carryover

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

Upgrade the existing City-owned open channel, approx. 1,800 feet from North Cota Street to the confluence with the existing Oak Street Channel. The project will also provide flood protection to the existing City-owned buildings and facilities adjacent to the channel. In partnership with Riverside County Flood Control and Water Conservation District; project number 2-8-00060.

CURRENT STATUS

Project is currently in planning phase. Design phase is tentatively scheduled to begin Summer 2026. Construction phase is scheduled to begin Summer 2027.

ONTARIO AVENUE WIDENING AT LINCOLN AVENUE

PROJECT NUMBER ST-2021-03

PRIORITY LEVEL Tier I

LOCATION Ontario Avenue at Lincoln Avenue

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Nathan Armendariz and Lynh Nguyen

FUNDING STATUS Carryover/New

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

Improvements along a section of Ontario Avenue between Oak Avenue and S. Vicentia Avenue. The improvements include widening Ontario Avenue and constructing missing curb and gutter and Americans with Disabilities Act curb ramps, which will alleviate traffic congestion experienced during peak hours at the intersection of Ontario and Lincoln. Additionally, the project will construct missing infrastructure in the area, such as sidewalks, parkways, driveway approaches, and street lighting, which will improve pedestrian accessibility and continuity.

CURRENT STATUS

Project is currently in the design phase. Design completion is anticipated in the fall of 2025 and will be followed by the right of way phase in the winter of 2025 and construction in summer of 2026.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time.

RADIO ROAD RAILROAD GRADE CROSSING IMPROVEMENTS

PROJECT NUMBER ST-2022-05

PRIORITY LEVEL Tier I

LOCATION Radio Road

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Aaron Cox

FUNDING STATUS Carryover

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

The Radio Road Railroad Grade Crossing Improvement Project, consists of a federally funded, reimbursable project for railroad-highway at-grade crossing improvements. The project is administered by the California Department of Transportation, with whom the City would enter into a project funding agreement. Generally, CPUC section 130 projects are 90 percent federally funded and require a local agency match of 10 percent. Due to the California Department of Transportation's surplus of toll credit funding, the State has opted to cover the agency match portion with these funds. Therefore, the Radio Road Railroad Grade Crossing Improvement Project is 100 percent reimbursable to the City.

CURRENT STATUS

Project is in design phase. Design is scheduled to be completed early 2025. Construction phase scheduled in FY 2025.

PROJECT NUMBER ST-2019-02

PRIORITY LEVEL Tier II

LOCATION Intersection of Bedford Canyon Road and Georgetown Drive

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Rosalva Ureno

FUNDING STATUS Carryover

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

Safety and Traffic Infrastructure. As part of the development agreement with the New Home Company for the Arantine Hills Development, a new traffic signal is required to be funded entirely by the developer prior to the issuance of the first production building permit. The new traffic signal at Bedford Canyon Road and Georgetown Drive will help improve traffic circulation in the area by replacing the existing all-way stop signs. This traffic signal was included as a traffic mitigation measure for the Arantine Hills Development to improve traffic flow and traffic safety to the region. The project will include the construction of a new traffic signal, improvements to Americans with Disabilities Act (ADA) facilities in the area, rehabilitation of necessary pavement and roadway striping within the project limits and connection to the City's Advanced Traffic Management System.

PRIORITY LEVEL Tier II

LOCATION Promenade Avenue between McKinley Avenue and Buchanan Street

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Rosalva Ureno

FUNDING STATUS Carryover/New

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

Project to design and construct warranted signalized intersections at four locations of Promenade Avenue on the Eastern City boundary; locations include the intersections at Promenade at Richey, Promenade at Terra, Promenade at La Vista/Fairbanks, and Promenade at Buchanan. This project will implement traffic efficiencies while providing safer ingress and egress of adjacent neighborhoods. The project will design and construct 4 traffic signals, provide communication from the Traffic Management Center to these signals, and will implement traffic signal coordination of this corridor. Design to be completed in FY 2024 and construction to occur FY 2025. Promenade Ave is a five-lane major arterial linking Corona to the city of Riverside and is used as a heavy commuter route to avoid the congested 91 freeway.

ZERO EMISSION VEHICLE CHARGING INFRASTRUCTURE

PROJECT NUMBER ST-2025-09

PRIORITY LEVEL Tier II

LOCATION N/A

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Sudesh Paul

FUNDING STATUS Carryover

CATEGORY Streets, Traffic & Storm Drains

DESCRIPTION/JUSTIFICATION

Due to the California Air Resources Board (CARB)'s recently adopted Advanced Clean Fleets rule, all new and replacement medium- and heavy-duty vehicles are required to be zero-emission vehicles (ZEVs) by year 2027. The proposed project will conduct feasibility studies, identify future projects, and pursue competitive funding to prepare for the fleet transition to ZEVs.

CURRENT STATUS

This project is currently in the planning and feasibility study phase.

OPERATING BUDGET IMPACT

The new charging infrastructure will require routine maintenance.

ACCESS CONTROL REPLACEMENT

PROJECT NUMBER TC-2025-01

PRIORITY LEVEL Tier I

LOCATION All City Facilities

ADMINISTERING DEPARTMENT INFORMATION TECHNOLOGY

PROJECT EXPERT Jim Aukerman

FUNDING STATUS Carryover/New/Future

CATEGORY Technology & Communications

DESCRIPTION/JUSTIFICATION

The City's access control system is beyond its end of life, is no longer supported by the vendor, and continues to have difficulty finding replacement parts to keep the current system functional. As part of migrating the City's camera system to Genetec, IT has been migrating access control over to Genetec Access Control. With this funding, the IT department can continue migrating off of the legacy system and over to Genetec for all City facilities.

CURRENT STATUS

Project being implemented.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time.

EMERGENCY 911 PHONE SYSTEM REPLACEMENT

PROJECT NUMBER TC-2016-01

PRIORITY LEVEL Tier I

LOCATION Police Department

ADMINISTERING DEPARTMENT POLICE

PROJECT EXPERT Captain Paul Mercado / Matt Windish

FUNDING STATUS Carryover

CATEGORY Technology & Communications

DESCRIPTION/JUSTIFICATION

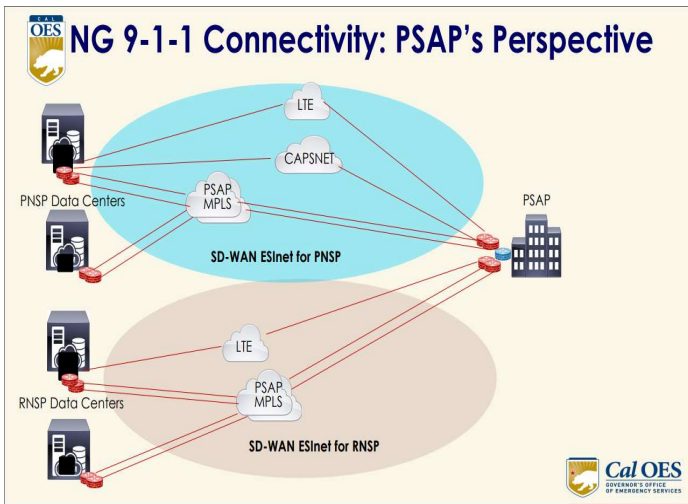

The Public Safety Access Points 9-1-1 phone system has reached its end of life and needs to be replaced. The equipment is typically replaced on a five-year life cycle. The current system was last replaced in 2016 and the system was able to be sustained two years longer with a maintenance plan. The California Office of Emergency Services is implementing NG-911 to transition from an analog 911 system to a digital and Internet Protocol (IP) based system. A new call-handling platform is necessary to utilize the secure, interconnected IP and cloud-based networks that allows for seamless communication between the 9-1-1 caller and dispatcher.

CURRENT STATUS

The 9-1-1 phone system is currently in its last year of maintenance. The project has not started due to a delay by the state. The state is trying to centralize the vendor.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time. The maintenance is typically included with the equipment for a five-year period.

NEW VHF RADIO SIMULCAST AND BACKHAUL SYSTEM

PROJECT NUMBER TC-2023-01

PRIORITY LEVEL Tier I

LOCATION Citywide

ADMINISTERING DEPARTMENT INFORMATION TECHNOLOGY

PROJECT EXPERT Jim Aukerman

FUNDING STATUS Carryover

CATEGORY Technology & Communications

DESCRIPTION/JUSTIFICATION

The VHF system is the communication method for the Fire Department and the backup communication method for the Police Department. The existing equipment has reached its end of life and is becoming no longer serviceable. In its current condition, the system will soon reach a point where we cannot maintain it and keep it online.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

No operating budget impact associated with this project.

AIRPORT LIFT STATION REPLACEMENT

PROJECT NUMBER UT-2033-02

PRIORITY LEVEL Tier I

LOCATION Airport

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Replace the existing lift station with a duplex wet well and dry well lift station. The current lift station is expected to exceed its useful life between 2027 and 2033, and will require replacement during that period.

CURRENT STATUS

New project for FY 2033.

OPERATING BUDGET IMPACT

This project will replace the existing lift station, preventing the City from incurring additional maintenance costs in the future.

ALCOA DIKE POTABLE WATER NON-COMPENSABLE

PROJECT NUMBER UT-2019-01

PRIORITY LEVEL Tier I

LOCATION Northwest Corona Near the Airport

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Michelle Laurendine

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The Alcoa Dike project will be designed and constructed by the County of Orange. The City of Corona will pay its own share of the project. The project is designed to protect adjacent businesses along Rincon Street from a 190-year flooding event. The dike will be approximately 30 feet tall at its highest point.

CURRENT STATUS

The Alcoa Dike is under construction. Construction for Phase 2 began in Fall 2021. The second phase is estimated to be completed in 2025.

OPERATING BUDGET IMPACT

Each individual project may or may not increase the operating budget. Abandonments will decrease the operating budget as the infrastructure will no longer be used. Budget may have to increase due to the non-compensable items that USACE and OCPW presents to the City for reimbursement.

BOOSTER PUMP STATION IN 1220-ZONE

PROJECT NUMBER UT-2024-01

PRIORITY LEVEL Tier II

LOCATION Mabey Canyon Road

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Currently, 1380-Zone potable water is delivered from the southeast side of Corona, creating significant head losses across the distribution system. A booster pump station is needed to pump water directly from the 1220-Zone distribution main in Foothill Parkway to serve the Skyline Development and fill a future 1380-Zone storage tank. This project is being paid for by the developer. The City is solely covering the inspections of the facility. This is related to a developer agreement and must move forward if development moves forward.

CURRENT STATUS

This project will not begin work until the Skyline development begins.

OPERATING BUDGET IMPACT

This is not an existing facility within the City. The Department will begin to incur new operational and maintenance costs for the booster pump station. Typical maintenance costs include mechanical/electrical supplies & equipment, tank inspection & cleaning, etc.

BURD TRANSFORMER REPLACEMENTS AT VARIOUS LOCATIONS

PROJECT NUMBER UT-2020-01

PRIORITY LEVEL Tier I

LOCATION Various Locations

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/New

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The purpose of this project is to move Burd Transformers from underground to above ground where possible. The objective is to change out the 25 kVa Burds with 50 or 70 kVa Burd or aboveground Pad Mount Transformer (PMT). This is an ongoing replacement of the 25 and 50 KV Burd transformers as they undersized and are reaching the later portion of the life cycle. Without this project coming to completion, we risk load issue causing potential service interruptions to the City Customers in Dos Lagos.

CURRENT STATUS

CENTRIFUGE INSTALLATION AT WATER RECLAMATION FACILITY #1

PROJECT NUMBER UT-2021-02

PRIORITY LEVEL Tier I

LOCATION Water Reclamation Facility #1

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project is for the installation of a second centrifuge at Water Reclamation Facility #1. This project is ranked a medium priority, however the design is currently in motion and construction is scheduled to begin the following year. The belt press will be replaced with a second centrifuge because most of the infrastructure is already in place. The current belt press was installed in the late 1990s and requires frequent maintenance. Belt press is due for major overhaul/rebuild.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

For the centrifuge, the annual operating cost will be minimal impact. Since we are replacing a belt press with a centrifuge identical to the existing one, the operating cost of the centrifuge should be less than the cost of repairing, operating and maintaining the existing belt press. Therefore, there should be a modest savings in annual operating costs after deducting the cost of servicing the belt press to be abandoned.

CITYWIDE AMI METER REPLACEMENT

PROJECT NUMBER UT-2022-03

PRIORITY LEVEL Tier I

LOCATION Various Locations

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will replace, or retrofit, Citywide direct read water meters with AMI meters. By completing this project, the department is able to obtain real time, remote meter reads. It will be possible to detect leaks in real time and provide customers the ability to monitor their usage in real time.

CURRENT STATUS

Project is going.

OPERATING BUDGET IMPACT

This project will have an operating impact estimate of \$525,000 each year plus CPI. Our cost reduction estimate is \$1,060,000 each year plus CPI. This means by implementing the AMI project we estimate a savings of \$535,000 each year plus CPI; however, this amount does not include future meter replacements as meters degrade.

COMMON WELL 22 UPGRADES

PROJECT NUMBER UT-2013-05

PRIORITY LEVEL Tier II

LOCATION Well 22

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will have the common well line reconstructed with new piping, gate valves, Bailey valve, air-vacs, "hot box" enclosures, new fencing, relocated hydrant, and the lot graded with new asphalt. By completing this project, existing operational and site issues will be resolved to include replacing the high maintenance Cla-valve with a Bailey valve, mitigating noise from the pressure reducing valve, making the fire hydrant more accessible, and regrading and repaving the west side of the pump house to drain away from the pump house and towards the street.

CURRENT STATUS

Design was completed, bid amounts came in higher than expected. Construction on hold until FY 2027 based on priority ranking.

OPERATING BUDGET IMPACT

Well 22 is a currently budgeted for site. This project would effect the operating budget by improving the condition of assets at Well 22 and enhancing operational efficiencies. There will be no operating impact.

PROJECT NUMBER UT-2033-03

PRIORITY LEVEL Tier II

LOCATION Coronita, Auto Center Drive from Frontage to Research

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Coronita is currently relies on a septic system, and this project will provide necessary infrastructure by upgrading the sewer on Auto Center Drive from Frontage to Research to support the potential addition of future customers. Although this project is ranked as a medium priority, the project will only move forward if Coronita is annexed and an agreement is reached with the County.

CURRENT STATUS

New project for FY 2033.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time - While it may influence the operating budget, the new expenses will be offset by revenue from new sewer customers. Sewer main infrastructure is funded through the Capital Improvement Plan, covering typical costs such as materials, labor, equipment, and other associated items.

DESCRIPTION/JUSTIFICATION

The Desalter Chemical Feed System project will install a polyphosphate and Y2K chemical system. By completing this CIP, we can have improved chemical storage, lower delivery charge and improved injection and monitoring. Consequences if not completed include increased chemical cost, less efficient injection, and monitoring.

CURRENT STATUS

Moving project to FY 2027 based on priority ranking.

OPERATING BUDGET IMPACT

DOWNTOWN SIXTH STREET WATERLINE REPLACEMENT

PROJECT NUMBER UT-2016-02

PRIORITY LEVEL Tier II

LOCATION Sixth Street

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project involves the design and construction of approximately 4,600 LF of 8-inch ductile iron waterlines between Fifth and Seventh Streets and between Ramona Avenue and East Grand Boulevard. Though this project did not rank as a high priority, it will move forward as it is a part of the downtown revitalization. This project is needed to revitalize Corona's downtown area. To accomplish this, the City will need to complete several infrastructure modifications, including the abandonment and reconstruction of several waterlines.

CURRENT STATUS

Collaborating with Downtown Sixth Street Beautification and Revitalization Project.

OPERATING BUDGET IMPACT

Minimal Impact - maintenance costs will increase for the new line as it ages.

EL CERRITO SEWER MAIN CONSTRUCTION

PROJECT NUMBER UT-2033-04

PRIORITY LEVEL Tier II

LOCATION El Cerrito

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

El Cerrito currently relies on a septic system, and this project will provide necessary infrastructure by installing a new sewer mainline in the unincorporated area to support the potential addition of future customers. Although this project is ranked as a medium priority, the project will only move forward if El Cerrito is annexed and an agreement is reached with the County.

CURRENT STATUS

New project for FY 2033.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time - While it may influence the operating budget, the new expenses will be offset by revenue from new sewer customers. Sewer main infrastructure is funded through the Capital Improvement Plan, covering typical costs such as materials, labor, equipment, and other associated items.

ELECTRICAL VAULTS WATER INFILTRATION MITIGATION AT VARIOUS LOCATIONS

PROJECT NUMBER UT-2023-13

PRIORITY LEVEL Tier I

LOCATION Various Locations Throughout the City

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will design and construct new electrical vaults throughout the city. The new design and construction will help eliminate water accumulating inside existing vaults. This will look at options to eliminate any openings and cracks with different treatment.

CURRENT STATUS

This project is in the RFP phase.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time. By completing this project, potential equipment failure due to water accumulation will be eliminated and pumping costs will be reduced.

GALLOWAY LANE SEWER EXTENSION

PROJECT NUMBER UT-2020-02

PRIORITY LEVEL Tier II

LOCATION Galloway Lane

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The Galloway Sewer Extension project will construct sewer lines and appurtenances necessary to connect certain private properties located on Galloway Lane to the City's public sewage system. Project is ranked medium priority, however the project is in motion. The homeowner with the failing septic system on Galloway has connected to the sewer and entered into an agreement with the City to pay his fair share of a new sewer construction. The proposed development at Galloway and Nelson might affect the plan to construct this sewer.

CURRENT STATUS

Project is ongoing.

GLEN IVY RADIO COMMUNICATIONS TOWER

PROJECT NUMBER UT-2023-17

PRIORITY LEVEL Tier I

LOCATION Glen Ivy Communications Tower

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Update radio tower at Glen Ivy to increase the reliability and redundancy of radio communications to the Glen Ivy sites. Glen Ivy Wells (#3 and #21) and the Glen Ivy WST historically have had poor communications, with the upcoming completion of the new WRF3 Radio Tower there is a good potential that if a properly sized Radio Tower was built at Glen Ivy, we can increase the reliability and redundancy of radio communications to the Glen Ivy sites. This project will also be dependent on the future of the Glen Ivy Sites and if the Utilities Department will continue to utilize those sites for water production/distribution.

CURRENT STATUS

Project is in the planning phase.

OPERATING BUDGET IMPACT

Minimal impact operating budget impact is expected.

GLEN IVY WATER TREATMENT PLANT

PROJECT NUMBER UT-2023-15

PRIORITY LEVEL Tier I

LOCATION Coldwater Basin Well

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

New water treatment plant at Glen Ivy for the Coldwater Basin well. The Glen Ivy Wells are under the direct influence of surface water and require 3 log removal. The installation of this facility will provide the needed filtration and CT that must be achieved in order to utilize Well 3 and Well 21.

CURRENT STATUS

This project is in the design phase.

OPERATING BUDGET IMPACT

This will increase ground water production for the utility, the increased use of groundwater production will lessen the amount of imported raw or treated water to meet system demand.

GRAND QUAD WATERLINE REPLACEMENT

PROJECT NUMBER UT-2016-03

PRIORITY LEVEL Tier II

LOCATION Downtown Grand Quadrant

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will combine all of the Grand Quadrant waterline projects under one parent CIP. Child CIPs will be requested as projects are ready for construction. Engineering will be looking at the entire waterline system when doing design to create one large plan for that area. Waterlines within the circle are aging, undersized, in poor condition, and located in alleys with poor access and minimal separation from sanitary sewers. Replacement is necessary to modernize the distribution system and improve emergency fire flow capabilities. Though this project ranked as a medium priority, design will be started in FY 2025 to be ready for construction in future years.

CURRENT STATUS

This project is in the planning phase and is collaborating with street improvement projects.

OPERATING BUDGET IMPACT

By completing the waterline infrastructure repairs, this ensures that the system is performing. This project will have no additional operating costs, as this is a rehabilitation of an existing line. This project will receive the same type of maintenance.

LESTER BACKWASH BASIN

PROJECT NUMBER UT-2021-06

PRIORITY LEVEL Tier II

LOCATION Lester Water Treatment Plant

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will construct a perimeter CMU wall and perimeter post and cable railing on top of perimeter CMU wall. In addition, it will install a light pole at the southwest side of the basin and construct a larger backwash basin with new VFD's, pumps, and piping. By completing this CIP, we can improve backwash water storage, limit filter backwash stacking, utilize/reclaim more backwash water and control backwash water levels. Consequences if not completed include: lowered plant performance/production and increased water waste.

CURRENT STATUS

Design will be completed in FY 2027, plan to construct in FY 2028 based on priority ranking.

OPERATING BUDGET IMPACT

After the installation, there will not be any changes to operational strategy of the Lester treatment plant or its backwashes.

LESTER INLET VALVE RELOCATION

PROJECT NUMBER UT-2013-01

PRIORITY LEVEL Tier II

LOCATION Lester Water Treatment Plant

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The project will relocate a valve onto property into an open vault with staircase powered by plant generation. By completing this CIP, plant performance and redundancy would improve. In the event of a power outage there will be no way to regulate the flow control valve; service of the antiquated existing flow control valve could be difficult due to vault limitations.

CURRENT STATUS

Design is planned to begin in FY 2027.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time. The inlet valve is a currently budgeted item; this project would only move the location of the inlet valve.

PROJECT NUMBER UT-2013-02

PRIORITY LEVEL Tier I

LOCATION Lester Water Treatment Plant

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will relocate the post disinfection injection point onto 30" filter effluent line between filters and Contact Chlorine Basin, as well as install two injectors. By completing this CIP, filters 5 and 6 would be able to run independently. They would have better mixing, effluent metering, and improved chlorine application. Consequences, however, for not completing the project include: poor chemical mixing; no combined effluent metering; and less options when running filters.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time.

PROJECT NUMBER UT-2015-06

PRIORITY LEVEL Tier I

LOCATION Old Temescal/Compton Avenue/Fullerton Avenue

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project proposes to extend the existing reclaimed water pipeline system by constructing a new 8" diameter reclaimed waterline and appurtenances in Old Temescal Road between Compton Ave and Fullerton Ave. This project will increase local water supply through the use of reclaimed water.

CURRENT STATUS

Design is complete, project will be constructed in FY 2025 once other priority projects have been completed.

OPERATING BUDGET IMPACT

There will be maintenance costs associated with maintaining the new reclaimed waterline. Items typical in the Reclaimed Water Infrastructure budget include supplies, valve assessment and exercising, and utility marking. Project operational cost is less than \$50,000, this project will have minimal impact to the operating costs.

PFAS AND 1, 2, 3-TCP REMEDIATION

PROJECT NUMBER UT-2024-10

PRIORITY LEVEL Tier I

LOCATION Ion Exchange Treatment Plant, Wells 7a and 8a.

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The addition of one GAC vessel at the Ion Exchange Treatment Plant, and modification of existing piping. This will also add dedicated lead and lag GAC vessels to both well 7a and 8a. This will allow more flow through the facilities while creating a true lead lag configuration and aid with media change outs, monitoring, and increasing groundwater production. This project will lower overall concentrations of PFAS and TCP.

CURRENT STATUS

In Design Phase.

OPERATING BUDGET IMPACT

The operating impact cost for the first year is estimated to cost \$405,000; this cost consists of the removal and regeneration costs at the Ion Exchange Treatment Plant plus sampling costs. In future years, we anticipate adding an additional Operator III as well as additional maintenance at each facility. These operating impact costs will fluctuate from \$376,000 to \$986,000. In addition to this project, a project is being requested for the GAC Full Media Replacement, which is expected to occur every 5 years and is estimated at \$412,000 in FY 2028 and \$424,360 in FY 2030.

POTABLE WATERLINE REPLACEMENT PROJECT #1

PROJECT NUMBER UT-2025-02

PRIORITY LEVEL Tier II

LOCATION To Be Determined

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS New/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Each year, a certain level of waterline replacement is necessary to replace all asbestos cement pipes in the City. This project is considered emergency type projects and do not follow the usual project prioritization process. Waterlines that experience frequent leaks are given top priority ensuring that the most critical issues are addressed promptly. By completing the waterline infrastructure repairs, this ensures that the system is performing.

CURRENT STATUS

New project for FY 2026 and ongoing into future years.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time - This is a rehabilitation of an existing line. This project will receive the same type of maintenance.

RESEARCH/RAILROAD SEWER LINE REPLACEMENT

PROJECT NUMBER UT-2013-06

PRIORITY LEVEL Tier II

LOCATION Research Drive and Railroad Street

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The project will replace approximately 200 LF of sewer lines in two locations. The City received fair share payments from the Thomas Ranch LLC development agreement to be used to construct the sewer. Additional sewer flow from the development will increase peak daily flow to more than 67% of the depth in the pipe which exceeds the City's standard for maximum flow depth.

CURRENT STATUS

This project is in design phase, construction planned for FY 2027 based on priority ranking.

OPERATING BUDGET IMPACT

Maintenance costs will increase for the new line as it ages. Typical maintenance for these sewer lines is placed in an Operating & Maintenance Project (71950) and can include items such as materials, labor, equipment rentals, and staff time.

PROJECT NUMBER UT-2023-11

PRIORITY LEVEL Tier I

LOCATION Smith and Rincon

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Lift stations need to have proper flow meters to determine how the station is operating. In order to install new flow meters, the discharge piping must be brought above ground. Currently the station reads the flow through an open channel and tends to be inaccurate. A Mag meter provides daily flow read. By installing a Mag meter, it will allow Maintenance and Operations to better determine any issues that the station may have.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

Annual calibration of the Mag meter will be required.

DESCRIPTION/JUSTIFICATION

Replacement of asbestos cement pipe that has reached its life span and has had multiple breaks in the last few years. Includes Ridgeview Terrace, Sherborn south of Railroad, and alleyway behind 800 South Victoria. This project is necessary to prevent emergencies when watermain breaks occur.

CURRENT STATUS

New project for FY 2027.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time. This project will have no additional operating costs, as this is a rehabilitation of an existing line. This project will receive the same type of maintenance.

AERATION DIFFUSER REPLACEMENT

PROJECT NUMBER UT-2021-09

PRIORITY LEVEL Tier I

LOCATION Water Reclamation Facility #1

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The project will replace aeration panels with EDI diffusers at Water Reclamation Facility #1. This project, if delayed, will result in the use of twice as much electricity for aeration. Additionally, the process requires a higher use of bleach to complete the nitrification process due to poor oxygen levels and oxygen control.

CURRENT STATUS

This project was completed December 2024. Project closeout end of 2025.

OPERATING BUDGET IMPACT

Minimal impact. There will be an operating budget savings because the project will reduce the amount of electricity and sodium hypochlorite usage.

PROJECT NUMBER UT-2026-02

PRIORITY LEVEL Tier II

LOCATION Water Reclamation Facility #1

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS New

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The current electrical panel is overloaded and has deteriorated due to exposure to chlorine fumes. Additionally, the existing instrumentation is exposed to the elements, and the new instrumentation is sensitive to UV light, making it better suited for an indoor environment. By consolidating both the electrical equipment and instrumentation into a single, enclosed powerhouse, these assets will be protected from UV exposure and chlorine fumes, ensuring better longevity and functionality.

WATER RECLAMATION FACILITY #1 DRYER REBUILD

PROJECT NUMBER UT-2021-04

PRIORITY LEVEL Tier II

LOCATION Water Reclamation Facility #1

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

On January 10, 2020, the dryer experienced an explosion, which destroyed multiple components of the system and caused the dryer to become inoperable. An investigation was completed to determine the cause of the explosion, and staff is working with the City's insurance company and multiple consultants on options to rebuild the facility. On June 3, 2020, the City Council authorized the creation of a capital improvement project to track expenditures for the Dryer rebuild. Water Reclamation Facility #1 is the City's largest water reclamation facility. The water reclamation plant operates a biosolids drying facility, which dries sludge resulting from the reclamation process and creates Class A EQ biosolid pellets. The dryer decreases the water weight of the sludge, saving costs on sludge hauling. The pellets produced from the dryer are sold to an outside vendor to be used in a fertilizer product, providing the City with an opportunity for revenue generation.

CURRENT STATUS

Project is in planning phase.

OPERATING BUDGET IMPACT

The Department already budgets for the dryer. Currently it is out of service. The rebuild will have associated maintenance costs; however, it is not currently known what these costs may be. Since Class A EQ biosolids are not being generated at this time, Class B biosolids are being hauled offsite until the dryer repair is complete.

PROJECT NUMBER UT-2023-08

PRIORITY LEVEL Tier II

LOCATION Water Reclamation Facility #1

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The Primary Gallery MCC and the Blower Room MCC are past the estimated life, need to be replaced to City Standards. This project would design and replace both new Motor Control Centers needed. The current Motor Controls are old, parts are obsolete, and need to be updated. If the Blower Room MCC failed it would be a major impact on Airflow to the Aeration basins. If the MCC in the Primary Gallery failed it would be a major impact on the Primary Process.

CURRENT STATUS

Project is currently in the design phase.

OPERATING BUDGET IMPACT

Upgrading the MCCs will reduce the liability and increase reliability. MCCs require preventative and corrective maintenance as needed.

DESCRIPTION/JUSTIFICATION

This project will repair the asphalt roadway at Water Reclamation Facility #2. Existing paving has deteriorated which may cause a potential stormwater permit violation. Completing this project will improve paving and establish stormwater permit compliance through the installation of a curb and detention basins.

CURRENT STATUS

Project is complete. Initiating project close out.

OPERATING BUDGET IMPACT

Minimal impact. This project will be minimal impact to maintenance costs for basins, lowers costs of regulatory compliance monitoring on the site. The current budget includes no maintenance costs for the asphalt at Water Reclamation Facility #2. Once the asphalt is replaced, maintenance costs will increase as the roadway is used more.

DESCRIPTION/JUSTIFICATION

The 2 clarifiers were installed in 1986 and are at the end of useful life. The metals inside of each clarifier is deteriorating and needs to be upgraded. The design will cover current building and seismic codes; construction follows design. A failure to complete this project will result in an inoperable plant without the primary clarifiers.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

No operating budget impact identified at this time.

DESCRIPTION/JUSTIFICATION

The center column that holds the complete system up is failing, maintenance has made many repairs to this issue. These Clarifiers are a major part of the plant process. The current clarifiers are old and need to be upgraded. The old design is failing.

CURRENT STATUS

Project is in bidding phase.

OPERATING BUDGET IMPACT

This project will have minimal operating impact.

WATER RECLAMATION FACILITY #3 COMMUNICATIONS TOWER

PROJECT NUMBER UT-2021-12

PRIORITY LEVEL Tier III

LOCATION Water Reclamation Facility #3

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The project includes the installation of the 110' Water Reclamation Facility #3 (WRF#3) Communications Tower to be used primarily for SCADA and UD. The project also includes the installation of wireless communication equipment at WRF 3. This will improve communication in the valley near Dos Lagos which will have a direct impact to Temescal Public Safety Facility. The project is needed due to the decommissioning of Water Reclamation Facility #3 and also to improve radio signal coverage in the area.

CURRENT STATUS

Project on hold.

OPERATING BUDGET IMPACT

Minimal impact, The new communications tower would require annual maintenance, including preventative maintenance inspections, FCC licensing, and repairs of the equipment as needed.

WATER RECLAMATION FACILITY #3 LIFT STATION

PROJECT NUMBER UT-2015-05

PRIORITY LEVEL Tier I

LOCATION Temescal Canyon Road

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Serena Hinojosa

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The Water Reclamation Facility #3 (WRF#3) Lift Station project will construct a 1.2 MGD Wet Well/Dry Well Sewer Lift Station to deliver flow from WRF#3 to the Arantine Hills Sewer Lift Station. This project is required for the decommissioning of WRF#3. Water Reclamation Facility #3 (WRF#3) currently treats sewage generated in the Dos Lagos and Eagle Glen communities. The new sewer lift station will pump sewage currently treated at WRF#3 to the Arantine Hills LS where it will be pumped to a gravity sewer at California Avenue. The sewage will flow through a gravity sewer to WRF#1. This will allow the decommissioning of WRF#3.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

Minimal impact, The Water Reclamation Facility #3 Lift Station cost will be less to maintain than Water Reclamation Facility #3 after it is decommissioned.

WATER STORAGE TANK IN 1380-ZONE

PROJECT NUMBER UT-2016-01

PRIORITY LEVEL Tier I

LOCATION South of Foothill Parkway, Final Location TBD

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

The project will construct a 2.5MG Type 1 pre-stressed concrete potable water storage tank at a location to be determined south of Foothill Parkway. This project will construct a 2.5MG potable water storage tank at a location to be determined that is South of Foothill to provide storage on the west side of Corona to eliminate existing water delivery problems. The storage in the 1380 Zone is located on the east side of Corona and requires pumping water a long distance through the distribution system.

CURRENT STATUS

This project is in planning status and the department is currently exploring grant opportunities.

OPERATING BUDGET IMPACT

This site does not currently exist within the City. When the site is built, the City will begin to incur new operation and maintenance costs. Costs that are typical with a water storage tank include tank inspection and cleaning, utilities, electrical/mechanical preventative and corrective maintenance, etc.

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

Replace approximately 2,400 LF of 8" and 10" Aluminum Composite Panel (ACP) and steel waterline in Sherman aver with 2400 LF of 12" DIP. This waterline will be replaced because it has a history of leaking.

CURRENT STATUS

New project for FY 2027.

OPERATING BUDGET IMPACT

Maintenance costs will increase for the new line as it ages. Typical maintenance for these waterlines is placed in an Operating & Maintenance Project (71930) and can include items such as materials, labor, equipment rentals, and staff time.

WELL 15 RELOCATION

PROJECT NUMBER UT-2013-04

PRIORITY LEVEL Tier III

LOCATION To be determined.

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project would construct a new Well closer to the 91 freeway. This project will relocate Well 15 because a developer would like to build in the area that it is currently located. This project is ranked low, if development moves forward, funding will need to be moved to an earlier year. Design funding remains in the current year, to allow staff to move forward with the design as needed.

CURRENT STATUS

New project for FY 2030.

OPERATING BUDGET IMPACT

Well 15 was taken down as a result of the 91 project. When the Well is reconstructed, the City will have new maintenance costs. Typical costs associated with a well include mechanical/electrical supplies, valve corrective maintenance, painting, utilities, etc.

PROJECT EXPERT Tom Moody

FUNDING STATUS Future

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will drill and equip Well 34. The project is needed to increase local groundwater supply.

CURRENT STATUS

New project for FY 2033.

OPERATING BUDGET IMPACT

When the Well 34 project is complete, the new Well will have operational and maintenance items associated with it. As the Well begins to age, there will be more preventative and corrective maintenance costs, which would include items such as mechanical/electrical supplies and equipment and equipment rebuilds. In the Operations budget, typical items include utilities, chemicals, etc.

WRCRWA BOOSTER PUMP STATION

PROJECT NUMBER UT-2023-04

PRIORITY LEVEL Tier I

LOCATION Western Riverside County Regional Wastewater Authority Treatment Plant

ADMINISTERING DEPARTMENT UTILITIES

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover/New

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will complete the transmission system loop between the WRCRWA Plant and the Water Reclamation Facility #1 tank. Wastewater is being delivered to the WRCRWA plant where it is treated to reclaimed water standards. This project will aid in capturing the reclaimed water from the WRCRWA plant and delivering it throughout the City's distribution system.

CURRENT STATUS

Project is ongoing.

OPERATING BUDGET IMPACT

For the WRCRWA Booster Pump Station, it is anticipated that the maintenance of the booster pump station will be shared between the agencies that benefit from it. Typical maintenance cost for a Booster Pump Stations is an average of \$19,000 per year; operational cost per Booster Pump Station is estimated at \$105,000 for a total of \$124,000.

WRCRWA FLOW CONTROL IMPROVEMENTS (XVI)

PROJECT NUMBER UT-2023-03

PRIORITY LEVEL Tier I

LOCATION Butterfield Park (preferred location)

ADMINISTERING DEPARTMENT PUBLIC WORKS

PROJECT EXPERT Tom Moody

FUNDING STATUS Carryover

CATEGORY Utilities

DESCRIPTION/JUSTIFICATION

This project will complete the transmission system loop between WRCRWA Plant and the Water Reclamation Facility #1 (WRF#1) Tank. A PRV will be installed at Butterfield to reduce the pressure in the 833 Subzone and discharge supply from WRCRWA to the WRF#1 Tank. The project will install a flow control station, which will allow WCRWA flow to bypass the WRF#1 BPS-Ponds directly to the WRF#1 Tank. This is an essential facility to split flow from WRCRWA to the Cota Ponds and the WRF#1 Reclaimed Water tank.

CURRENT STATUS

Design phase scheduled to be completed in 2025.

OPERATING BUDGET IMPACT

This would be a new asset in the City. Typical maintenance costs for a flow control station include utility costs, such as electricity, SCADA, preventative and corrective maintenance on various components throughout the site, etc. This project will have minimal impact.
